

Skycraft

Virtual Air Charter

CHARTER – MEDEVAC – CARGO

From our base at Oshawa Executive Airport to across North America, Caribbean & Europe. Skycraft welcomes you aboard our historical relaunch in the simulator world.

About Skycraft VAC: | **CALLSIGN:** Skycraft | **ICAO:** SKG | **IATA:** SF |

Skycraft is a corporate charter and regional airline service based out of Oshawa Executive CYOO that also offers medevac and cargo contracts. With the spike of COVID-19, it has become incredibly harder to travel with the airlines in all the cut in services. We let you charter our aircraft from any airport in Ontario to wherever your personal or business needs require. Skycraft Virtual Air Charter officially started operations on January 7th, 2021. Nearly 27 years after Skycraft Air in real life ceased operations in 1994.

History of the real life Skycraft Air Transport:

Skycraft Air Transport Inc. was a Canadian airline based at Oshawa Municipal Airport.

Skycraft Air Transport was created as a charter airline targeting the express air freight needs of the North American automotive industry. It was based in Oshawa, Ontario, where its biggest customer, [General Motors Canada](#), operated two large car assembly plants. Its principal competitive advantages were its diverse fleet, with different aircraft that could economically carry different sized loads, and its ability to dispatch aircraft to virtually any North American destination within one hour of a customer request.

By the late 1980s the airline was operating a flying school and had diversified into the [air ambulance](#), passenger charter and scheduled service markets. Its scheduled services included flights from [Oshawa Municipal Airport](#) to [Ottawa](#); [Montreal](#); [Windsor, Ontario](#); and [Detroit](#).

The airline was notable for changing the type of aircraft operated on its passenger services to match the number of passengers booked for each flight.

Skycraft's colour scheme consisted of having the lower part of the fuselage painted in white or silver, the middle part painted with the red title of 'Skycraft', and the tail painted in white or silver, with a large letter 'S' in red and the Canadian flag.

Skycraft filed for court protection in 1992. It subsequently obtained new financing and continued operations with a reduced fleet, but the new business plan was not successful. The airline finally shut down operations in February 1994.
